

## **Wineman Technology Expands to Support Customers in the Southeast United States**

### *New Talent Increases Geographic Coverage and Brings New SCADA Expertise*

**SAGINAW, Mich. – August 1, 2011** – Wineman Technology announced today that Bill Edwards, President of Aegis Solutions, joined the Wineman Technology team as a Business Development Manager for the Southeastern United States. In addition to Edwards, Wineman Technology has hired several members of the Aegis Solutions engineering staff and will be operating an office from Aegis' former site located at 4651 Paragon Park Road in Raleigh, North Carolina.

"We are very excited about this opportunity which allows us to grow our business in the southeast region of the U.S. as well as the opportunity to work with former customers of Aegis Solutions," said Matthew Eurich, President of Wineman Technology. "Bill's strong reputation, industry expertise, and extensive footprint with automated test systems will be an asset to Wineman Technology."

For the past 11 years, Aegis Solutions has been a provider of engineered equipment and software for test and measurement, data acquisition and analysis, inspection, process control and monitoring, and SCADA. Using common off-the-shelf hardware and software platforms, they designed, developed, and deployed customized test systems, test stands, inspection equipment, process control systems, supervisory control, and monitoring systems tailored to clients' specific requirements.

As National Instruments Alliance members, both companies had similarities in hardware platforms and NI LabVIEW software development. Employing the Aegis Solutions team expands Wineman Technology's customer base, geographical coverage, and brings SCADA capabilities to Wineman Technology. Wineman Technology's strong development staff now includes five Certified LabVIEW Architects and an additional seven Certified LabVIEW Developers. This, coupled with Wineman Technology's design-and-build and turnkey services, offers Aegis Solutions' former clients in the southeast a larger and more capable solutions provider.

"The Aegis Solutions team is excited about joining Wineman Technology," said Bill Edwards. "Since we share the same core philosophies of delivering highly functional, high-quality equipment and great customer service, it will be an easy transition into the Wineman Technology culture. Our customers will realize tremendous benefit from the expanded capabilities and resources that Wineman Technology provides."

### **About Wineman Technology**

Established in 1991, Wineman Technology, Inc. specializes in providing the right technical solution for solving a wide range of test applications, such as [dynamometer systems](#), [servo-hydraulics](#), [data acquisition systems](#), real time control, [hardware-in-the-loop \(HIL\) systems](#), and [general testing machines](#). Unlike other companies where test plays a partial role, Wineman Technology's singular focus is the design and development of test equipment for advanced research and development, functional test labs, and manufacturing production. Our decision to focus on test systems with a diverse range of capabilities enables us to deliver maximum system reliability, serviceability, and support.
